SENSORS, SWITCHES, ELECTRONIC CONTROLS

---

April 2009

Dear Customer:

ITW Switches is currently investigating the compliance of our products and their components to the European Union Directive 2002/95/EC. Due to the volume of requests and the intensive nature of investigating each request, we are unable to specifically address each request in the variety of formats required. Therefore, we ask for your understanding in accepting this letter as our current statement of compliance with the Directive for the products listed below. As we continue to investigate each of our products, we will update this letter to reflect products in compliance. Updates will be made monthly and posted on our website ([www.itwswitches.com](http://www.itwswitches.com)). Although the products shown in this letter have been compliant even prior to the creation of the EU Directive for RoHS and WEEE, each customer is responsible for determining the suitability of these products in their respective applications and manufacturing processes.

ITW Switches RoHS Compliance Statement:

Directive 2002/95/EC, after 1st July 2006, prohibits the following substances in new electrical and electronic equipment.

Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyls (PBB) and Polybrominated Diphenyl Ethers (PBDE).
