for In Cab Applications

**TW** Switches

# CABIN INDUSTRIAL CONTROLS

Whether it be Soil, Water or Dust the sealed pushbutton switches from ITW Industrial offers peace of mind for long term performance and high reliability.

Our Industrial HMI solutions offer a consistent look and feel & are designed to fit the wide breadth of applications both inside and outside the Cab environment.

ITW Industrial product ranges are suited to both analogue or digital environments, using various medias & interfacing to a variety of vehicle controllers.

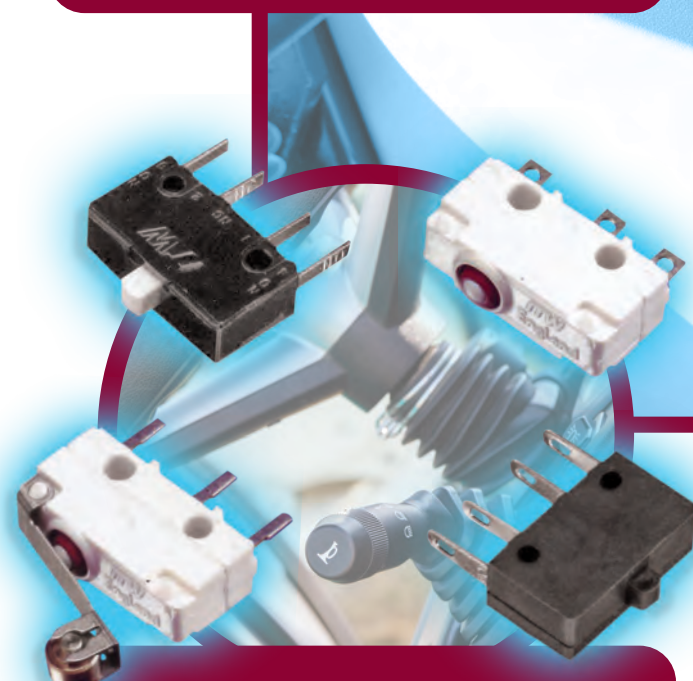

Our eMech and Hall Effect pushbuttons are particularly suited for use on HMI on control panels within the vehicles cabin or remotely on joysticks & panels to provide the HMI for vehicles attachments.
